

Fiber Optic Network Solutions

High-performance Data Transmission from the Edge to the Core

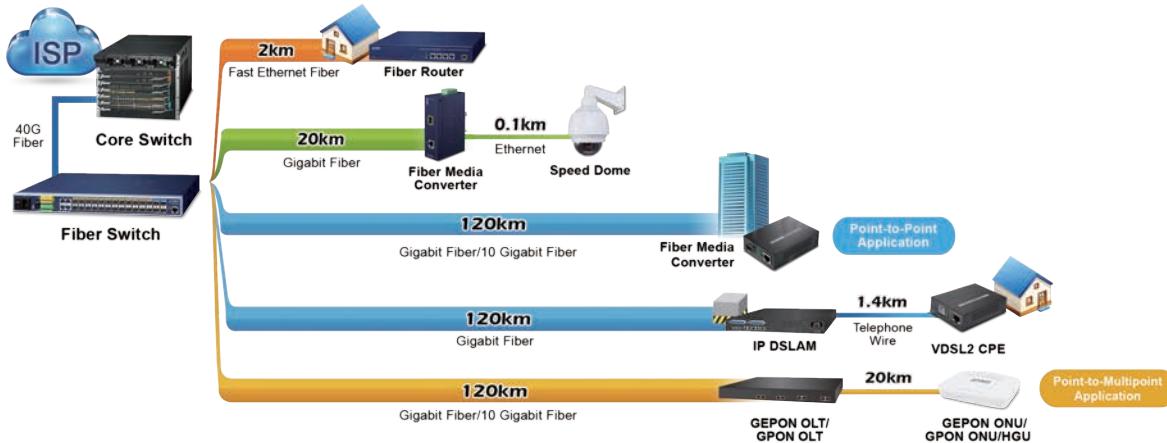

- Metro Ethernet • xPON • Media Conversion • Industrial Fiber • VDSL2

Broadband - Fiber Optic & Last Mile

In the broadband communication, fiber optic technology has become the mainstream for communities and telecom transmission deployment as it fulfills the cloud application, high-demanding multimedia streaming needs and a transmission distance of up to 120km. To satisfy the demand of the FTTx infrastructure, PLANET has come out with a complete product line of Fiber Switches, Fiber Routers, Metro Fiber Switches, Commercial and Industrial Media Converters, GPON/ GEPON OLT, GPON/ GEPON ONU, and PoE Media Converters. PLANET also provides a combined CO and CPE VDSL2 solution to meet the last mile transmission requirements.

FTTx / Metro Ethernet

To improve the technology of Optical Fiber Ethernet with highly-flexible, highly-extendable and easy-to-install features, the data exchange speed of Optical Fiber Ethernet is up to 100Gbps and the distance of Gigabit Optical Fiber is up to 120km. PLANET provides many kinds of Point-to-Multi Point Managed Fiber Switches and CPE especially for Metro Ethernet applications. The benefits of Metro Ethernet Switches include not only professional Internet Management Technology, such as IPv6/IPv4 Dual-Stack, Q-in-Q VLAN, Multicast, QoS, Security and High Availability, but also Optical Ethernet Internet Architecture up to 100Gbps to meet the needs of high-bandwidth multi-media. PLANET Metro Ethernet Switch Solution is the best choice to connect the enterprise, community and campus in the metropolitan area to backbone network for service providers.

PLANET Last Mile Transmission Solution includes 3 different kinds of technologies, such as VDSL2, GPON/ GEPON, and Fiber for various applications. For each technology, PLANET provides not only CO (Central Office) side of equipment for ISP but also CPE (Customer Premises Equipment) side of device for end users. PLANET Last Mile CO equipment including GPON/ GEPON OLT, Fiber Switches and CPE devices including VDSL2 Routers, GPON/ GEPON ONU, and Fiber Routers enable long distance IP Surveillance deployment and many multimedia services to be realized on local high speed Internet, such as:

- IPTV/HDTV
- VoD (Video on Demand)
- Voice over IP
- On-line Game & Music
- Distance Education
- Video Conference/Video Phone
- Remote Work

PLANET Last Mile Transmission Solution with the combination of CO and CPE provides the excellent bandwidth to satisfy the triple play devices for home entertainment and communication.

GPON/GEPON

The PLANET GPON/ GEPON Solution delivers high-speed voice, data and video services to residential and business subscribers. Through the PON technology, PLANET GPON/ GEPON Solution offers competitive advantages including a long-term life expectancy of the fiber infrastructure, lower operating costs from the reduction of "active" components, supporting up to 20km distance between equipment nodes, easy installation and maintenance, and most importantly, providing much greater bandwidth. PLANET GPON/GEPON Solution is the perfect solution for FTTx applications by offering benefits of cost-effectiveness, scalability and flexibility to network deployment.

Industrial Fiber Switches & Media Converters

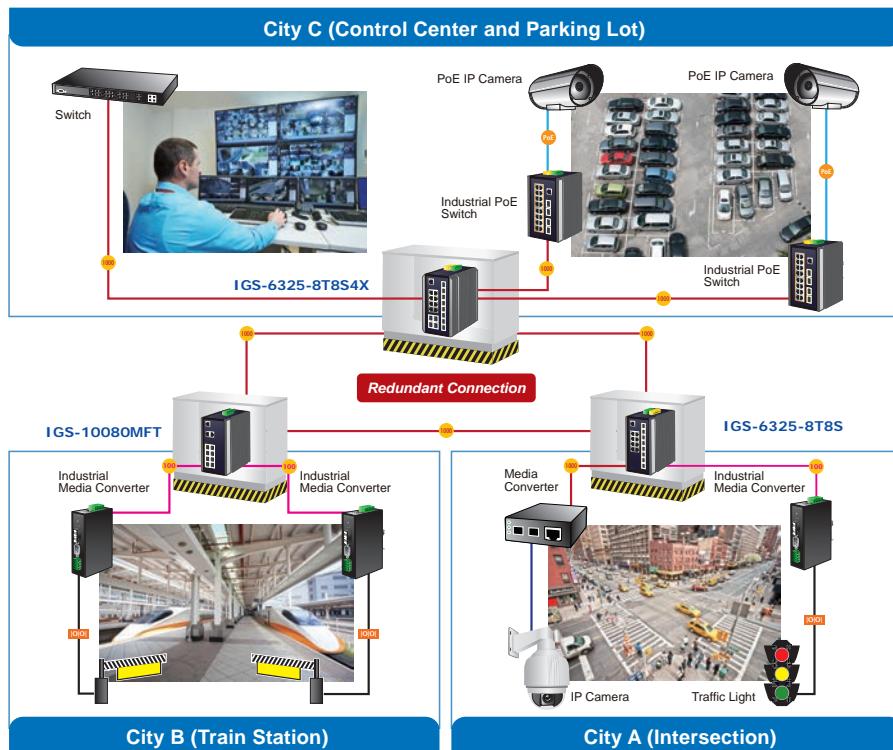

PLANET Industrial Ethernet Solution offers high reliability and security to ensure continuous industrial operation in harsh environments such as factory floors, outdoors, and places with extreme temperatures. The Industrial Ethernet upgrades the traditional, proprietary factory-floor networks to a low-cost, high-performance, and scalable architecture. PLANET Industrial Ethernet switches and converters integrate 100/1000 Fiber technology with highly-reliable and long-reach data transmission. PLANET provides suitable product portfolio for information level, control level, and device level in the Industrial Ethernet network.

Fiber-Optic Link Capability Extends the Range of Network Deployment

The SFP slots built in with PLANET Industrial Fiber Switches are compatible with 100BASE-FX or 1000BASE-SX/LX/WDM through SFP (Small Form Factor Pluggable) fiber-optic transceivers. The fiber-optic uplink capability guarantees the throughput to all nodes hooked into the network and the Gigabit Ethernet distance can be extended from 550 meters (Multi-mode fiber cable) up to 10/20/30/40/50/70/120 kilometers (Single-mode fiber or WDM fiber).

Media Converters

Media conversion is a cost-effective solution to extending fiber networking rapidly rather than adopting optic fiber only. It also efficiently helps to solve the distance limit between the Ethernet and Local Area Network. With the feature-rich chassis provided by PLANET, at least 16 converters can easily expand the fiber-optic networks by simply plug and play. The wiring distance of PLANET media converter chassis is extendable from 2 to 120 kilometers and available upon request as well.

Building a network solution of FTTH (Fiber to the Home) or FTTC (Fiber to the Curb) for ISPs, the PLANET Managed family of chassis and FST/GST/XST series converters offer the multiple selections for FTTx deployment. The Managed family is a series of managed Media Conversion Center that provides hot plug and play slots for various types of converters. Through the management interface, the entire status of the converters could be remotely controlled within the chassis from on/off and status/statistics of ports, as well as the advanced features like redundant links.

Multi-function Converter Chassis

Managed Media Converter Chassis

The MC-1610MR series is ideal for telecom and corporate applications where a number of fiber links need to be managed and controlled from a central location. The management function provided by the MC-1610MR series enables network administrators to monitor media converter connection status and configure the converters remotely via web browser or locally. Through the management interface, the entire status of the converters such as link on/off or statistics of the port will be clearly demonstrated and monitored.

Managed Media Converter Chassis		Web / SNMP Management	
Model	MC-1610MR	MC-1610MR48	
Product Image			
	Managed	Managed	
Slots	16 converter open slots; 2 power slots (1 loaded)		
Dimensions (W x D x H)	440 x 350 x 88 mm; 2U		
Power Requirements	100 ~ 240V AC, 50/60Hz	-48V DC (-30 ~ -60V DC)	
Power Consumption	120 watts (full load)	96 watts (full load)	
Environment	Operating Temperature: 0 ~ 50 degrees C Humidity: 5% ~ 90% RH (non-condensing)		
Converter Modules	PLANET FST-80x, GST-80x series (Page 11), XST-705A		
Management	SNMP v1/v2C, Web, CLI, SSH		
Management Ports	1 x RS232 Console 1 x 10/100BASE-TX RJ45; Auto-MDI, Auto-Negotiation		
Features	System Temperature Threshold Protection, Slot Redundancy, Hot-swappable dual power system, SNMP trap		
Emission	CE, FCC class A

Hot-Swappable / Flexible Power Input

Power Module

Standard Media Converter Chassis

The MC-1500 series provides 15 slots for PLANET's full-ranging media converters, including Fast Ethernet, Gigabit Ethernet or VDSL2 Converters. The 15 slots in the 19" rack-mountable housing help to save more spaces for Fiber-Optic wiring, simplify the structure and ease the maintenance of media conversion. With an independent power supply on each slot of the MC-1500 series, any converter is hot-swappable without causing an interruption to other converters. Each bay of the media converter chassis can be populated with any of PLANET's media converter series, the FT, GT, VC-20x and ICS, to provide media conversion between fiber optic, phone wire, serial and copper lines, offering high flexibility in installation and cost-effective scalable solution.

Passive Optical Network - xPON

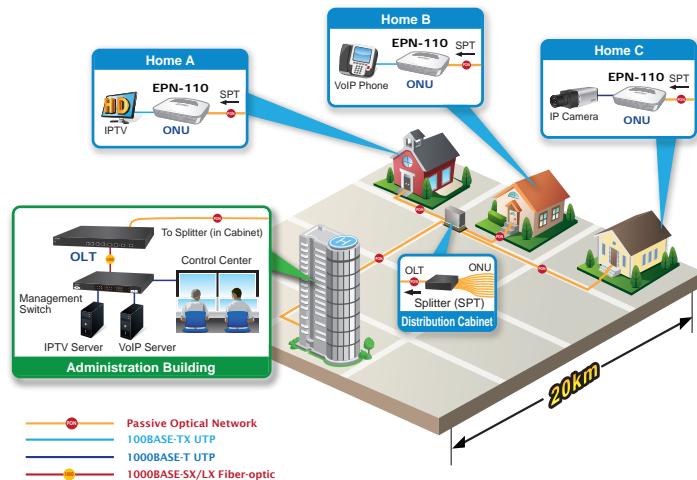

Passive Optical Network (PON) would be the most promising Next Generation Network technology to meet the high bandwidth demand for HDTV, IPTV, VoIP and multimedia broadband applications. PON technology is developed to support PMP (Point-to-Multi-Point) applications and offers the advantages of reduced cost by sharing the equipment and fiber at the CO, and easy maintenance compared to the active equipment.

PLANET offers the perfect GPON/GEPON OLT and ONU solutions bringing the FTTx applications with high scalability yet cost-effective network connection. The competitive advantages of PLANET GPON/GEPON OLT and ONU solutions include:

- High split ratio of 1:128 (GPON)
- High split ratio of 1:64 (GEPON)
- Up to 20km distance between equipment nodes
- Centralized management with user-friendly GUI utility
- Easy installation and maintenance
- Lower operating costs from the reduction of "active" components

Fiber To The Home (FTTH) Application

Network Connectivity Products

GPON OLT	
Model	GPL-8000

Transmission Speed	Downstream: 1.25 Gbps Upstream: 1.25 Gbps
Ethernet Port	8 x 1000BASE-T RJ45, 4 x Gigabit SFP interface 4 x 1G/10G SFP+ interface
PON Port	8 x PON interface
Console Port	●
Management Port	1 x 10/100 RJ45 port
Maximum Splits	128 per PON port
Maximum Distance	20km
IEEE 802.3ah	●
IEEE 802.3ah FEC	●
OAM	●
DBA	●
SLA	●
802.1Q VLAN	●
