## 4. Web Login

### 4.1 Starting Web Managemen

The following shows how to start up the Web Management
of the Serial Device Server. Note the Serial Device Server is of the Serial Device Server. Note the Serial Device Server is
configured through an Ethernet connection. Please make sure configured through an Ethernet connection. Please make sure
the manager PC must be set to the same IP subnet address. For example, the default IP address of the Serial Device Server s 192.168.0.100, then the manager PC should be set to 192.168.0.x (where x is a number between 1 and 254, except 100 ), and the default subnet mask is 255.255 .255 .0

Figure 4-1: IP Management Diagram

### 4.2 Logging in to the Serial Device Server

 1. Use Internet Explorer 8.0 or above for Web browser and enter IP address $\boldsymbol{h t t p : / / 1 9 2 . 1 6 8 . 0 . 1 0 0}$ (the factory-default P address) to access the Web interface.2. When the following dialog box appears, please enter the default user name "admin" and password "admin" (or the password you have changed before) as shown in Figure 4-2.

Figure 4-3: Web Main Screen of Serial Device Server

## -5 -

Default IP Address: 192.168.0.100 Default Account: admin

Figure 4-2: Login Screen
3.After entering the password, the main screen appears as After entering the

.The Server Menu in the midale of the Web page lets you access all the functions and statuses the Serial Device Server rovides.

## 

Now, you can use the web management interface to continue the Serial Server management. Please refer to the user manual for more.

1. For security reason, please change and memorize the new password after this first setup.
Note
Only accept command in lowercase letter under web interface.

## 5. Remote Telnet Login

### 5.1 Remote Teinet Login

The Serial Device Server also supports Telnet for remote management. You can use Telnet to open a terminal session
over one of the Ethernet ports. The Serial Server asks for use over one of the Ethernet ports. The Serial Server asks for user name and password for remote login when using Telnet; please for the first-time login.

Default IP Address: 192.168.0.100
Default Username: admin
Default Password: admin
You will be presented with a text menu displaying the Seria Device Server's general settings, which you will be able to view and modify. Please refer to User Manual for a description of the available settings.

## 6. Getting Started with VCOM Utility

With Serial Device Server's VCOM administration utility, you can easily install and configure one or multiple ICS-110 ICS-115A or ICS-120 device servers over the network from ile Device Server:

- Searching device
- Creating virtual Com port
- Firmware upgrade
- Importing or exporting file

### 6.1 Installation of VCOM Utility

The ICS-110/ICS-120 VCOM Utility can be downloaded from LANET Web site. Please locate and run the setup program vspsetup.exe" and follow the on-screen instructions.
ownload link: https://www.planet.com.tw/en/support/download s?\&method=keyword\&keyword=ICS\&view=6\#list
After installing, rebooting your workstation/PC is required.

```If you have difficulty in downloading or executing VCOM Utility,
software first.
```

### 6.2 Searching Serial Device Server

First click "Add Device" and then click "Search" if Serial Server has access to network, as shown below.

-9-

### 6.3 Serial Server Login

The ICS-110/ICS-120 Serial Server is password protected, so user can't modify any settings. The user must first log in the ICS-110/ICS-120 if the password is correct; the status incorrect, the status will pop up an error window.

6.4 Serial Server Setting

Click "Settings" to open the target Serial Device Server's configuration window.

Parameters are grouped into tables. Click "OK" to implement changes
lease refer to user manual for a description of all functional properties for the Serial Device Server

- 11 -

### 6.5 COM Port Mapping

While using the COM Mapping of VCOM Utility, the connection between the ICS-110/ICS-120 and the PC device administrator will create the corresponding Virtual COM Port, which supports Microsoft Windows XP or above platform.

## - Add COM

If your Serial Server has been found, select it in order to add it to the COM mapping list. Click "OK" to take effect.

## COM Mapping Settings

Click "Modify COM" to configure Serial Server's serial COM port.

User can manually assign COM number to the ICS-110/ICS-120 Serial Server. After that, user can click the "OK" button, and finally must press the "OK" button to take effect.

## 7. Recovering Back to Default Configuration

## IP Address has been changed or admin

 password has been forgotten -To reset the IP address to the default IP address "192.168.0.100" or reset the login username and password to default value, press the hardware-based reset button on the bottom panel for about 5 seconds. After the device is rebooted,
you can log in the management Web interface within the same you can $\log$ in the management Web interface within the same the previous setups will be disappeared after the factory default reset is made.
