

5/8-Port 10/100/1000Mbps Gigabit Ethernet Switch

The GSD-504 / GSD-804 are 5/8-Port 10/100/1000Mbps Gigabit Ethernet switches in compact housing for easily desktop deployment.

Providing 10/16Gbps non-blocking switch fabric as well as 8K MAC Address table, the GSD-504 / GSD-804 support 802.3x full duplex flow control and also offer wire-speed packet transfer performance without risk of packet loss. The Gigabit ports with jumbo frame feature supported can handle extremely large amounts of data transmission in a secure topology linking to a backbone or high-power servers.

All RJ-45 copper interfaces support 10/100/1000Mbps auto-negotiation for optimal speed detection through RJ-45 Category 3, 4, 5 or above cables. MDI/MDI-X auto detection is provided for direct wire connection to any Ethernet device without requiring crossover cables.
